Officer Service

All what you need to run this service is to\*\*

- CREATE database officers .
- Change database password in application.properties
- Run the Registry service eureka.

APIs of this Service :

NB: In this service: host = http://localhost:8085/api

GET :

- host/officers : To get the list of all officers. ( **ADMINs** are the only ones allowed to call this )
- host/officers/{id} : To get an officer by his id. ( **The ADMINs && The OFFICER who owns this account are the only ones allowed to call this** )
- host/officerByEmail/{email} : To get an officer by his email ( **The ADMINs && The OFFICER who owns this account are the only ones allowed to call this** )
- host/officerByRole/{role} : to get all officers with a specifiic role(job). ( **ADMINs** are the only ones allowed to call this )
- host/officerByAgencyId/{agencyid} : to get all officers working in a specific agency by the agencyld . ( **ADMINs** are the only ones allowed to call this )
- host/getMyId : To get the officer's Id for the one who is connected.
- host/officerAgencyIdByEmail/{email} : to get agencyld of an officer. ( **OFFICERS** are the only ones allowed to call this )

POST :

- host/officers : to create a new officer , the given data should be in this format: ( **ADMINs** are the only ones allowed to call this )

```
{  "firstName": "mounib",  "lastName": "ahbane",  "email": "a2@gmail",  "address": "ouarzate",  "birthDay": "2020-05-08T00:00:00.000+0000",  "cin": "P12354",  "phoneNumber": "023659485",  "gender": "male",  "role": "directeur",  "agencyId": 125698}
```

*Id* is auto-generated , Cin and email should be unique

PUT :

- host/officers/{id} : To update an existing officer ( **ADMINs && The OFFICER who owns this account is the only one allowed to call this** )

DELETE :

- host/officers/{id} : To delete an officer using his id ( **ADMINs** are the only ones allowed to call this )
